

## SYSTEMIC

– refer to article on Immunological Conditions

**Aspergilosis** - Nasal, bone condition.

**Systemic Lupus Erythematosus** – autoimmune disorder

**Seborrhea** – chronically reactive skin – diet, immune system

**Deep Staph Dermatitis** - cellulitis (folliculitis, furunculosis)

**Calcinosis Circumscripta** – calcified lumps that develop occasionally next to boney points eg. Sides of hocks, elbows side of the neck

**Perianal Fistula (Anal Furunculosis)** - Anal skin condition probably of an auto-immune basis
