

German Shepherd Dog Club of Tasmania Inc.
18th State Breed Assessment
The Esplanade, New Norfolk

25th May 2014

Assessor: Mrs Joylene Neddermeyer (SA)

SUMMARY:-

I would like to thank the German Shepherd Dog Club of Tasmania for once again inviting me to judge the 18th State Breed Assessment. As usual the hospitality and friendliness shown to me and also to Vince Tantaro, GSDCA President over the weekend was very much appreciated.

It was a great weekend assessing the current breeding stock in Tasmania and for me to have the opportunity to give some recommendations and guidance for your future breeding program.

When reading my critiques I am sure you will identify the areas that require improvement in the animals presented and these areas were also identified at the recent National Show and Trial and also on my recent judging appointment in New Zealand.

I can only ask that all breeders in Tasmania give due consideration when selecting a breeding partner for their animals and consider the best mate for that animal, not the current favour of the month or the most recent import.

I appreciate that the ever increasing cost and the tyranny of distance does not make it easy for you but please consider selecting a successful sire to increase the predictability of progeny within your litters and to confirm hip and elbow statistics.

The issue of the over-angulation of the hindquarter, the incorrect set, size and firmness of ears, slightly short and slightly deep lowerchest formation are areas that are prevalent not only in Australia but all over the world. And care must be exercised in our breeding program.

On behalf of the NBC Executive I would also like to congratulate the breeders in Tasmania for their support of the GSDCA Breed Improvement Schemes.

Thank you once again for the opportunity to come to Tasmania and I wish you all the best in your future breeding program.

3 yrs 11 mths, 65 cms, Large, medium strong, slightly elongated dog where the overall black saddle marking should be more defined. Slightly short neck, good withers, slight dip behind, firm back, short and steep croup. The upper arm should be longer and better angled, very good hindquarter angulation. Good fore and very good lower chest development where the lower chest should be a little longer. Stands not quite correct in front with slightly open feet, good head where the masking should be more defined, medium eye colour, slightly broad set ears. Steps very narrow at rear, correct in front, the elbows should be closer lying. During movement shows good ground covering gait both the hindquarter drive and forehand reach should be more expansive, the impediment of the length of the lower chest becomes more evident during movement, the wither overall should be carried higher during movement.
